

### To Order Your CarCapsule:

Measure your car from bumper to bumper, and from the outside front tire to the outside of the opposite tire.

Questions: call (219) 945-9493

### Customer Reviews

*"I did a frame off restoration on my 1969 442 convertible 7 years ago & have stored it in the capsule from day one. It's as pristine as the day it was restored. Just ordered a new fan. We are huge fans!" – Jeff*

*"This saved me having to spend \$2800 to add air conditioning to the garage to protect from humidity & I don't have to worry about my daughter dinging the car when she puts her bike away. Easy to set up. It's not every day you find something as good as billed." – Steve*

*she puts her bike away. Easy to set up. It's not every day you find something as good as billed." – Steve*

#### INDOOR CAR & BIKECAPSULES

# The Original Car Bubble™

Protecting Vehicles for over 20 Years™

## Indoor Version

**E.S.S.** - With the Evaporative Storage System the air inside the bubble is exchanged with filtered outside air 3-4 times every hour – keeping the inside temperature consistent with the temperature outside and eliminating condensation on your vehicle.

**PVC** - Durable 10 mil. Double polished radio frequency welded seams. Protects against accidental damages.

**Basemat** - 18 mil. Herculite material that is mildew, abrasion, and flame resistant. Also impervious to oil, gas, and antifreeze.

**Zipper** - Heavy-duty, 100% nylon coil zipper to prevent scratching and keeps out the rodents.

**Fan** - 12V High pressure 150 CFM fan with washable filter. Cost approximate \$1.75 month in electric.

### Protect Your Investment

## Outdoor Version

**E.S.S.** - With the Evaporative Storage System the air inside the bubble is exchanged with filtered outside air 5-6 times every hour – keeping the temperature inside the bubble consistent with the temperature outside and eliminating condensation on your vehicle.

**Top Cover** - Heavy duty 16 mil. tarp with UV protection and hot air welded seams. Cold crack flexibility to -20 degrees.

**Basemat** - 18 mil. tarp material that is mildew, abrasion, and flame resistant. Also impervious to oil, gas, and antifreeze.

**Zipper** - Heavy-duty, 100% nylon coil zipper to prevent scratching and keeps out the rodents.

**Fan** - 12V High pressure 380 CFM dual fans with washable charcoal filter system. Cost approximate \$4.00 month in electric.

## Overall Features

The indoor and outdoor CarCapsule and BikeCapsule are a “bubble” that completely seals and protects your vehicle or motorcycle from dings, dirt, dust, corrosion, mildew, musty odors, rust, and rodents.

**How it Works** - The heart of the CarCapsule and BikeCapsule is a high-pressure fan that provides continuous airflow to keep your vehicle or motorcycle dry and prevent condensation. With the Evaporative Storage System, the air inside the bubble is completely exchanged with filtered outside air up to 6 times every hour – keeping the temperature inside consistent with the temperature outside and eliminating any moisture that could condense on your vehicle or motorcycle. You can finally have peace of mind knowing that your investment is well protected.

**Setup** - The CarCapsule and BikeCapsule are easy to use! Layout the bubble on the floor, unzip the top section and fold back, drive your vehicle or motorcycle on to the black basemat, install the fan, place the top cover over your vehicle or motorcycle, zip it closed, and then plug the fan in. It takes about 7-10 minutes for the bubble to inflate.

*One year warranty in workmanship and materials.*
