MADE 2.0

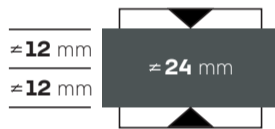

QUARRY

**GIGACER
OUTDOOR
SERIES**

All in one

Concept 1 is to conceive space with unity of form and style, using technical solutions that maintain aesthetic continuity through the environments and their multiplicity of uses, indoors, outdoors, on walls and furniture, in short: all in one. A unique ceramic range designed for every type of application, with a variety of colours and surfaces that can always be combined in an exclusive and personal way. A resistant, eclectic porcelain stoneware in natural and homogeneous shades, with 5 colours, 5 different surfaces and 3 thicknesses.

CONCEPT 1

MILK

STONE

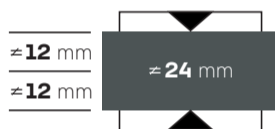

ASH

LAND

INK

A meeting between contemporary aesthetics and timeless elegance. The power of time which amalgamates and smoothes surfaces: the elegance of the series Inclusioni. Inspired by the force of the nature, Inclusioni is an encounter between contemporary aesthetics and timeless elegance. Surfaces are authentically material and refined: porcelain stoneware flakes produced under the skilful control of our laboratory technicians are deposited on the surface and incorporated; the result is a tangible and three-dimensional effect.

Made 2.0, in synergy with Concrete, is a flexible ceramic system used for living spaces. It is the most complete color / surface combination palette in neutral and natural shades: eleven colours and four different surface that could be adapted to the different needs of living. The same colour could be used from the indoor to the outdoor, in floors and covering and for the creation of kitchen tops and bathroom furniture while maintaining a strong chromatic coherence. All the Made 2.0 Palette corresponds to the Concrete colours. The White Sand colour can be combined with the Concrete White.

antislip R11 A + B + C

The best choice for nature

In strict respect for the environment typical of Gigacer, a series inspired by the solidity and strength of natural stone. Quarry offers great versatility: with its numerous formats and two different surfaces, mat R10 A+B and bocciardato antislip R11 A+B+C, it is suitable for both indoor and outdoor, residential and business contexts.

#24 mm
flooring
system for
outdoor
using

**# 24
mm**

24 mm system and the special antislip (R10 or R11 with A+B+C) surface guarantee high technical performances as well as remarkable safety for outdoor pedestrian use.

24 mm system is frostproof, inabsorbent, easy to clean, has very high resistance to impact, abrasion and to chemical aggressions.

≠24 mm consists of two standard porcelain stoneware slabs joined together. Porcelain stoneware slabs are joined by a two-components glue, obtaining a monolithic solidity. Thus linked, the two ceramic elements are then duly rectified to ensure precise and regular size to the slabs.

24mm system ensures that rain water regularly flows away thus preventing any stagnation.

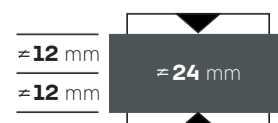

≠24 MM IS THE PROFESSIONAL FLOORING SYSTEM FOR OUTDOOR LAYING MADE BY GIGACER.

24 mm offers:

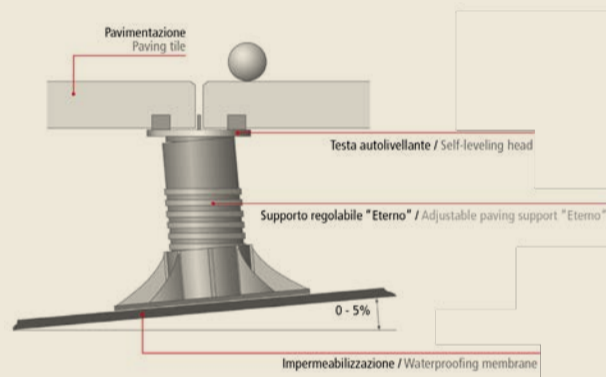

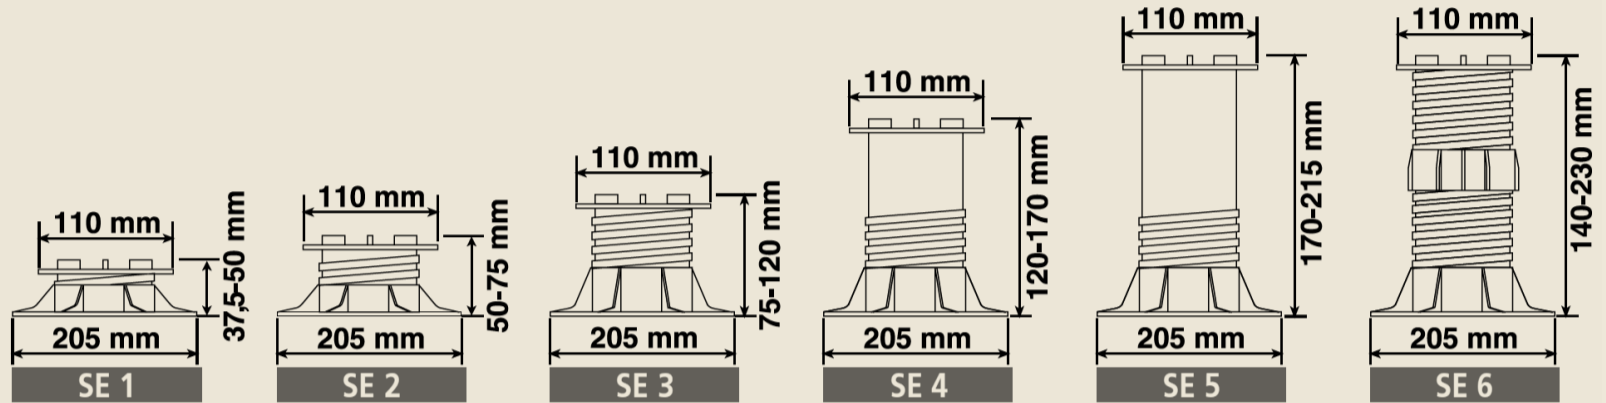

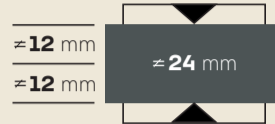

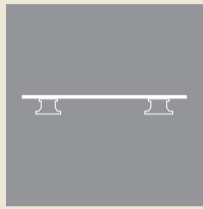

- Possibility to have the same product for the indoor and the outdoor spaces
- Big format 120x120 24 mm thickness
- Possibility to have an antislip material for the outdoor R11
- Efficace drainage
- Dry laying
- Endurance and strength
- Cleanability
- Frost resistance

Laying suggestions:

- Open terraces
- Closed terraces
- Walkways
- Swimming pools
- Gardens

A photograph of an outdoor dining set on a balcony. The set includes a dark brown wooden table and four matching chairs with light beige cushions. The table is rectangular with a slatted top. The chairs have a classic design with curved backs and armrests. The balcony is paved with light-colored tiles. In the background, there are several potted plants, including a large green bush and a smaller plant with pink flowers. A white patio umbrella is partially visible at the top of the frame. The overall scene is bright and inviting.
